

# Part 8 Acidity & Alkalinity – Balancing to Better Health

## Diabetes – Breakthroughs in Treatment!

"It wasn't really insulin. You don't have diabetes yet. It was just a warning shot."

### What is Diabetes?

Diabetes is a group of diseases marked by high levels of blood glucose, also called blood sugar, resulting from defects in insulin production, insulin action, or both. Diabetes can lead to serious complications and premature death, but people with diabetes can take steps to control the disease and lower the risk of complications. Diabetes, Type 1 and Type 2, is the third leading cause of deaths in the US and it is continuing to grow and become one of the

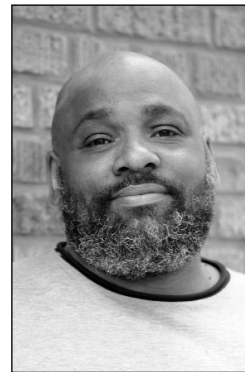

greatest epidemics. According to the National Diabetes Statistics in 2007, 23.6 million people in the US (300 million world wide) have diabetes (including people that have not even been diagnosed) — 7.8 percent of the population has diabetes. There are 750,000 new cases each year. We spent \$174 billion last year in US for Medicare and lost wages. And once we inherit diabetes through the lifestyle we live it can be passed down genetically to our children. To understand what happens inside your body relating to the development of diabetes, let's look at the life cycle of a peach. I think everyone has taken a bite of a peach which is not ripe yet. It is hard and has not yet become sweet. The peaches will become sweeter as they ripen with the sugar content increasing. In the end of the life cycle the peaches become too soft and enter the spoiling stage where they over soften and start to bruise. The cells of the peach are 'melting down' as the peach ages. This is what can happen to us when we don't take care of ourselves. The increase of sugars within our body leads to cellular deterioration/bruising with potential limb-amputation and ultimately DEATH!.

### Preventing Diabetes Complications- Introduction of the Hydroceutical.

Diabetes can affect many parts of the body and can lead to serious complications such as blindness, kidney damage, and lower-limb amputations. Working together, people with diabetes, can reduce the occurrence of these and other diabetes complications by controlling the levels of blood glucose, blood pressure, and blood lipids and by receiving other preventive care practices in a timely manner. We are familiar with insulin-injections and medications, products of eastern medicine and American health care.

It was not until recently that the HYDROCEUTICAL was introduced to the USA. This hydroceutical is known as Kangen Water. It's a electrically charged great tasting water you drink which can help bring your body back into homeostasis and can help alleviate the symptoms that occur in diabetes and many other diseases. 'Hydro' meaning water; 'ceutical' referring to having the impact in the body of a pharmaceutical, or prescription drug. But it is not a drug! It is the latest way that can provide healing in the body without the possible side effects and controversies associated with taking medications. Doctors have been treating patients in Japanese hospitals for over forty years with this hydroceutical. And with Japan being recognized as the healthiest country in the world, by The World Health Organization, it may not be a bad idea to consider what they do to stay healthy and live long lives.

Diabetes is the result of a pH imbalance around the pancreas which interrupts the way the body produces and uses insulin and sugar. With this ailment the pH is low, very acidic. You need to balance the pH in the body in order for the immune system to be functional and in harmony. Kangen water, the Hydroceutical, is alkaline water that is very permeable to the cells in the body allowing the acidic state to return to normal healthy conditions. The water is also a very high antioxidant which will neutralize the free radicals and toxins in the body. Diabetes can not occur when the body is healthy and in homeostasis. Ailments and diseases can not survive when the body is in a slightly alkaline environment, the same state we are born with. The water has three properties: alkaline, micro-clustering and antioxidant. This is the same miracle water which millions of people have collected from healing springs around the world, such as the Lourdes in France. Read on and see what Don has to say about this hydroceutical, the Kangen water:

"Hi my name is Don Ashman of Brooklyn, NY. I have been diabetic for 10 years now with problems including polyuria, losing my vision, poor sleep, dehydration, weight gain from the growth hormone medications and I became insulin resistant as a result of being obese. I was also at a time where gangrene entered my foot and I was in the hospital for 2 weeks coming to a point where my foot could have easily been amputated. I came across this Kangen water while I was traveling through Baltimore and finally decided to give it a try when I was in desperate need of a change.

When I started drinking the water I immediately felt energy come back into my life. The neuropathy and tingling sensation left my toes in 5 days. This water was part of my losing 51 lbs as I was becoming healthy. Everyone was blown away at the speed of my recovery when I was at the hospital. I healed through this water and could very easily be without my left foot. This water allowed my body to heal itself. This miracle water has given me my life back."

**Don Ashman (Brooklyn, NY)**

Clearly, with Kangen water, you give your blood and body balanced pH levels and antioxidants, the best warriors against disease, illness and aging. Many are seeing Kangen water as a blessing in their lives. It is helping alleviate symptoms which occur in ailments such as: Cancer, Diabetes, High Blood Pressure, Heart Disease, High Cholesterol, Strokes, Arthritis, Menopause, Prostate Problems, Kidney Stones, Asthma, Eczema, Obesity, Stress/ Anxiety, ADD, Fibromyalgia, Acid Reflux.

To learn more about Kangen Water and relief from ailments and diseases please call 801-266-4736. You can always call to request a weeks worth of Kangen water for FREE just to see what all the hype is about. We will also be doing Kangen water demonstrations at health centers in the area. Call for a schedule of all Kangen events.

These statements have not been evaluated by the food and drug administration. We are not implying that Kangen water will cure any disease in the human body. Results may vary from one person to the next.
